FRONTEND DEVELOPER

experience

junior frontend developer @ Wirtualna Polska

06/2021 - now

I'm mostly involved in maintaining React app as a platform for 20+ *.wp.pl domain.
Daily work with a long-lived project (including adding new features and updating existing ones/libraries) gave me a lof of experience with legacy code and technical debt.
I'm also a developer's voice in multidisciplinary team working on refreshing legacy Preact website.

- close cooperation with designers, business, analytics
- developing new features
- refactoring & updating dependencies
- writing documentation
- maintaining an old React app & rewriting part of it on a new platform

COO @ CODE:ME

04/2015-12/2019

Running a business which involves: planning courses, recruiting trainers, project management, team lead. I've also been responsible for redesigning process of a new website.

assistant & project coordinator @ GIP Starter

09/2014-08/2017

I did a tone of pictures, wrote hundreds of words and created simple WordPress websites for educational projects. I helped with many events for kids and organised some for adults.

knowledge

tech
