FRONTEND DEVELOPER

experience

junior frontend developer @ Wirtualna Polska

06/2021 - now

I am a frontend developer on a **Preact-Typescript-Express** project and on its refreshment process.

I'm also a technical voice in a multidisciplinary team responsible for the projects' maintenance and development:
- close cooperation with designers, business managers, analytics, and editorial office
- developing new features, bug fixes etc. from technical decisions to deploying and monitoring production
- refactoring & updating dependencies
- writing documentation, both technical and functional

Daily work with **long-lived projects** gave me a lof of experience with legacy code and technical debt, and how to manage them.

COO @ CODE:ME

04/2015-12/2019

Running a business which involves: planning courses, recruiting trainers, project management, team lead.

assistant & project coordinator @ GIP Starter

09/2014-08/2017

I did a tone of pictures, wrote hundreds of words and created simple WordPress websites for educational projects. I helped with many events for kids and organised some for adults.

knowledge

tech

- quite good:
  HTML, CSS, JavaScript, React, Mobx, TypeScript
- with a room for improvement:
  Preact, Storybook, Node.js, Redux

tools

- Jira, Trello, Slack, Teams
- git: Gitlab, GitHub
- Figma, Adobe Illustrator

tech interests

- accessibility and inclusive web development
- human-centered design & development
- design systems

at work

I like to step out of the technical details and focus on the wider context of a task.

other

- good work organization
- enjoy working with people
- fast-learner
- communicative English
- in last D&D campaign I played as a sorcerer but in BG3 I'm a bard!

education

CODE:ME
course: JavaScript + React.js
02-04/2021

University of Gdansk
Polish philology
2009-2014

Master degree: 'Why corpses are funny? Word play in novels by Joanna Chmielewska'
